

To Demasys ltd.

Dear Sir/Madam,

I write to you with hope that I would answer to the interests of Demasys.

As I know Demasys is a leading company in the healthcare software creating. It work from years, with offices in different Bulgarian cities. The reputation of the company is very impressive and I will be glad to work with it. As you will see in my CV, I have been studying in the area of computer systems in the Telerik software academy, which I successfully finished with 147 other students out of over 1400. I also have a certificate for that. C# was the basic subject of my education there and I take the two parts C#1 and C#2 with excellence. In the academy I studied, practiced and created some projects in team and alone. I have a windows 8 project based on XAML and C# which extracts information from internet about biggest tennis champions and after that compare them named WhichTennisLegendIsBigger. This project has and services which I create and put in appharbor. I created and mobile application working on Android and IOS named 01.GrandSlamTennisCountryRang. It also has services. These projects and some other have a github urls and more detail descriptions in my CV. During databases course in Telerik academy I studied about and used ADO .NET Entity Framework. In my CV you can find and the url of my homework about it named 5.AdoNet. I also studied in the University of Food Technologies in Plovdiv. There I finished a master and bachelor levels of Computer Systems. I have a B2 level of English language from Euroelite School. I also traveled and worked on students brigades in the UK where I practiced the language. I am highly motivated to work and ready to learn. I think that I have the skills and qualities for the position of .NET/C# Developer.

I hope that I will have the chance to meet with you personally on a more detailed interview, where you will have a chance to evaluate my education and experience.

Yours sincerely,
Alexander Stoyanov
