

To Amexis ltd.

Dear Sir/Madam,

I write to you with hope that I would answer to the interests of Amexis.

As I know Amexis works in the areas of healthcare software creating, that assists hospitals and healthcare organizations. It works from years, with clients like ChevronTexaco, ConAgra Foods and others. The reputation of the company is very impressive and I will be glad to make my first steps in the IT industry with it. As you will see in my CV, I have been studying in the area of computer systems in the Telerik software academy, which I successfully finished with 147 other students out of over 1400. I also have a certificate for that. C# was the basic subject of my education there and I take the two parts C#1 and C#2 with excellence. In the academy I studied, practiced and created some projects in team and alone. I have a project on C# using OOP named 01Firm. It shows a machine-building firm organization. I have and a windows 8 project based on XAML and C# named WhichTennisLegendIsBigger. It extracts information from internet about biggest tennis champions and after that compare them. This project has and services which I create and put in appharbor. I created and mobile application working on Android and IOS named 01.GrandSlamTennisCountryRang . It also has services. All these projects and some other have a github urls and more detail descriptions in my CV. During databases course in Telerik academy I studied about and used ADO .NET Entity Framework and MS SQL. In my CV you can find and the url of my homework about it named 5.AdoNet. I also studied in the University of Food Technologies in Plovdiv. There I finished a master and bachelor levels of Computer Systems. I have a B2 level of English language from Euroelite School. I also traveled and worked on students brigades in the UK where I practiced the language. I am highly motivated to work and ready to learn. I think that I have the skills and qualities for the position of junior developer.

I hope that I will have the chance to meet with you personally on a more detailed interview, where you will have a chance to evaluate my education and experience.

Yours sincerely,
Alexander Stoyanov
